

GeoMama M2M 3350

GSM / GPRS Wireless Modem

Ready to go for Embedded Applications such as ATM, Vending Machines, Utility Meters, etc...

The M2M 3350 is a wireless data modem which allows you to access the internet. You can download emails, send TCP/IP message, send SMS messages, or make phone calls, all using your laptop or PC while on the road. The M2M 3350 uses USB power so no external power supply is needed. Communication is via either hot-swappable USB or RS-232 (serial). Features are:

- Compact size and low cost, made in Canada
- USB powered
- Quad-band 850/900/1800/1900 MHz
- Send SMS or make voice calls
- Access the web from anywhere
- Uses a standard SIM card
- USB or RS-232 (serial) communications option
- LEDs show complete modem status
- AT command set available for API
- Including Power Cable and GSM Antenna
